

Prasant Jakhar

Cloud & DevOps Engineer

prashantjakhar5@gmail.com | +91-6395358686 | [LinkedIn](#) | [Portfolio: prasantjakhar.xyz](#) | [GitHub](#) | [Blog](#)

Professional Summary

AWS Certified Cloud & DevOps Engineer with 4+ years of experience designing, automating, and managing AWS cloud infrastructure. Experienced in Infrastructure as Code using Terraform, CloudFormation, and Ansible, building secure CI/CD pipelines with AWS CodePipeline, Jenkins, and GitHub Actions, and deploying and orchestrating containerized applications using Docker and Kubernetes. Proficient in Python, Bash, and cloud monitoring with CloudWatch, Prometheus, and Grafana to deliver scalable, secure, and highly available solutions in Agile environments.

Core Technical Skills

Cloud Platforms: AWS (EC2, VPC, IAM, S3, Route53, CloudFormation, RDS, Lambda), Google Cloud, Azure

Containerization & Orchestration: Docker, Kubernetes (EKS, GKE), ECS/Fargate, Helm Charts

Infrastructure as Code (IaC) & Configuration Management: CloudFormation, Terraform, Ansible

CI/CD, GitOps & Version Control: GitHub Actions, Jenkins, AWS CodePipeline, Bitbucket, Git, GitLab CI, ArgoCD

Monitoring & Logging: CloudWatch, Prometheus, Grafana, ELK Stack

Scripting & Programming: Python, Bash, PowerShell, Java

Security & Practices: DevSecOps, Agile SDLC, GuardDuty, KMS, IAM Policies, Linux Administration

Professional Experience

Project: Amazon Robotics | Amazon | Remote | July 2021 - September 2025

Role: Subject Matter Expert - Cloud Infrastructure & Operations

- Designed, architected and managed scalable AWS infrastructure (EC2, VPC, S3, RDS, IAM) while automating resource provisioning using Terraform, CloudFormation, and Ansible, reducing manual effort by 70%.
- Designed and maintained secure CI/CD pipelines using GitHub Actions, ArgoCD improving deployment efficiency and reducing deployment time by 60%.
- Architected and operated containerized workloads across Amazon EKS, ECS and Fargate, driving scalable, highly available infrastructure for mission-critical services.
- Implemented monitoring, logging, and alerting with CloudWatch, Prometheus, Grafana and X-Ray achieving 99.99% system availability.
- Strengthened cloud security by implementing IAM best practices, AWS Secrets Manager, Amazon Inspector, and Python/Bash automation, reducing security risks by 40%.
- Led cloud cost optimization initiatives, reducing infrastructure costs by 25%, and collaborated with cross-functional teams using AWS Systems Manager Incident Manager to improve operational efficiency.
- Created AWS infrastructure documentation and mentored teams on cloud architecture, DevOps best practices, and the AWS Cloud Adoption Framework (CAF).

Education

B.Tech in Information Technology | Bharat Institute of Technology | Meerut, UP | 2021

Certifications

- AWS Certified CloudOps Engineer - Associate | 2026
- AWS Certified Developer - Associate | 2025
- AWS Certified Solutions Architect - Associate | 2024
- Google Cloud Certified: Associate Cloud Engineer | 2024
- AWS Certified Cloud Practitioner | 2024
- Certified ScrumMaster (CSM) | 2024
- HashiCorp Certified: Terraform Associate (004) | Ongoing

Technical Projects

- **Cloud Resume Challenge (AWS | Terraform | GitHub Actions | Lambda | API Gateway | DynamoDB | CloudFront)**
Built and deployed a serverless portfolio website using AWS serverless services, automating infrastructure provisioning and application deployment with Terraform and GitHub Actions.
- **Microservices E-Commerce App (eMart) (Docker | Kubernetes | EKS | Jenkins | Prometheus | Grafana)**
Containerized and deployed a multi-tier e-commerce application on Amazon EKS with Jenkins CI/CD, Prometheus, and Grafana for automated deployments and monitoring.
- **Netflix Clone Kubernetes Deployment (Kubernetes | Docker | GitHub Actions | ArgoCD)**
Containerized and deployed a Netflix Clone on Kubernetes using Docker, GitHub Actions, ArgoCD, and Ingress, enabling scalable, resilient, and automated deployments.
